RE: Docket # 98N-1038

"Irradiation in the
Production, Processing & Handling of
Food"

As a parent, an individual who is
health conscious, & knowledgeable
in the medical field I demand
the following:

- ① prominent & obvious labeling: (a) the
use of the radura symbol. (b) the
use of terms "irradiation" or "irradiated"
to be on packaging. (laymans terms.)
- ② I oppose alternative terms like
"cold pasteurization" or "electronic
pasteurization". They are misleading!!
- ③ Also - the absence of a statement is
misleading, because, irradiation destroys
nutrition & causes changes to my food
& my families food. ~~that~~

C4674

④ A five (5) year moratorium on all new GMFS (Genetically Modified foods).

Sincerely,
Dawn Wendt
~~Ker Wendt~~
Citizens/consumers
concerned for our
families well being.

Question: Does the president of Monsanto eat the foods his/her company manufactures?

ABSOLUTELY NOT!

That's a clue folks! Wake up + stop allowing money to run your life.

See attached petitions.

attention US government officials:

This counts as 4 people.

demand a federal law requiring labeling of all genetically modified foods and a five year moratorium on all new GMFs. I will not accept any U.S. food policy that does not place consumer choice, notification and protection first.

attention FDA: Keep Irradiation Labeling!

Presidents as 4
people.

Re: Docket # 98N 1038,
Irradiation in the
Production, Processing,
and Handling of Food"

demand the FDA keep irradiation labeling prominent by requiring product packaging and produce signage to use the radura symbol and the term "irradiated." I feel alternative terms such as "cold pasteurization" are misleading and should never be used.

CONSUMER RIGHT TO KNOW

petition

TO SECURE MANDATORY LABELING AND A FIVE YEAR MORATORIUM
ON ALL GENETICALLY ENGINEERED FOODS

SUBMITTED TO THE PRESIDENT OF THE UNITED STATES, CONGRESS, USDA AND FDA

New substances are being introduced into our foods via a technology called genetic engineering. A growing number of scientists and physicians are voicing concern over the possible health and environmental risks from these foods. Current laws and policies do not require labeling or adequate safety testing of these new genetically engineered foods. This petition upholds the right of consumers to have the knowledge to make informed choices about the foods they eat and feed their families – and will monitor the safe unfoldment of genetically engineered organisms into our food chain.

We, the undersigned, as citizens of the United States of America, strongly urge the passage of legislation and policies to mandate the clear and accurate labeling of all foods derived from, processed with, containing or consisting of genetically engineered organisms or agricultural application which affects the food supply – and a minimum five year moratorium on the release of any further genetically engineered organisms into all levels of our foods chain (from seed to processing to table) until adequate safety protocols can be put in place to assess their risk to our health and the environment.
